

ANISH M

 [anish2410461](#) |  anish2410461@ssn.edu.in |  +91 9894680436 | Chennai, India

SUMMARY

Third-year Computer Science and Engineering student at SSN College of Engineering with knowledge in programming, web development, and full-stack application development. Skilled in Java, React, Spring Boot, and MongoDB with hands-on experience building responsive and scalable projects. Passionate about software development and actively seeking internship opportunities.

ACADEMIC EXPERIENCE

Programming and Software Development 2024 – Present

- Skilled in Java, Python, and C programming
- Good understanding of Data Structures, Algorithms, and Object-Oriented Programming
- Built projects using clean and modular coding practices

Backend and Database Development 2024 – Present

- Worked with Spring Boot for backend application development
- Experience with MySQL and MongoDB databases
- Learned REST APIs, authentication, and database integration

Frontend and Full-Stack Development 2024 – Present

- Developed responsive websites using HTML, CSS, JavaScript, React.js, and Tailwind CSS
- Built modern user interfaces with focus on responsive design and user experience
- Deployed projects using platforms like Vercel and Render

AI and SaaS Development 2025 – Present

- Built AI-based SaaS applications using Gemini AI and OpenAI APIs
- Learned prompt engineering and AI workflow optimization
- Worked with Clerk authentication, Stripe payments, and Supabase integration

PROJECTS

SwiftCart – Full-Stack E-Commerce Platform

- A modern e-commerce platform for product browsing, authentication, and online shopping workflows
- Built using React, Spring Boot, and MongoDB Atlas with separate frontend and backend architecture
- Implemented JWT authentication, Spring Security, secure REST APIs, and protected frontend routing
- Developed product management, category filtering, cart workflows, and responsive user interfaces
- Configured deployment and secure cross-origin communication using Vercel and Render
- Live: [Project Link](#)

TaskZen – Multi-Tenant Productivity Platform

- A productivity and task management platform designed for teams and personal workflow organization
- Developed using React, Spring Boot, and MongoDB with multi-tenant architecture support
- Implemented task scheduling, deadline tracking, automated notifications, and drag-and-drop task boards
- Built responsive dashboards with smooth state management and interactive UI components
- Focused on scalable backend systems, secure API handling, and optimized user experience
- Live: [Project Link](#)

Stylish – Responsive Storefront

- A responsive multi-page storefront website for showcasing fashion and product collections
- Built using HTML, CSS, and JavaScript with responsive layouts and interactive UI components
- Implemented mobile navigation menus, search filters, product grids, and hover animations
- Applied reusable styling systems, responsive media queries, and adaptive page layouts
- Optimized the website for desktop, tablet, and mobile viewing experiences
- Live: [Project Link](#)

YouTube Clone – Responsive Video Platform Interface

- A frontend clone of the YouTube homepage focused on responsive video platform design
- Developed using HTML, CSS, Flexbox, and CSS Grid with adaptive layouts
- Built responsive navigation, search interface, video recommendation grids, and sidebar systems
- Implemented media-query based mobile layouts and optimized UI responsiveness
- Focused on clean frontend structure, spacing consistency, and modern interface design
- Live: [Project Link](#)

PromptPolish – AI Prompt Optimization SaaS

- An AI-powered SaaS platform that improves and restructures prompts for better AI-generated responses
- Built using Next.js, React, Tailwind CSS, and Gemini/OpenAI API integrations
- Implemented prompt analysis, optimization workflows, authentication, and subscription-based access systems
- Integrated Clerk authentication, Stripe billing, and Supabase for scalable SaaS functionality
- Designed responsive real-time AI interfaces with modern UI and scalable frontend architecture
- Live: [Project Link](#)

EDUCATION

2024 – 2028	B.E. Computer Science Engineering , SSN College of Engineering Current CGPA: 8.31	
2024	Class XII – Sri Vijay Vidyalaya Matric Hr. Sec. School	96%
2022	Class X – Sri Vijay Vidyalaya Matric Hr. Sec. School	93%

SKILLS

Programming Languages	Java, Python, C, JavaScript
Frontend Development	HTML5, CSS3, Tailwind CSS, React.js, Responsive Web Design
Backend Development	Spring Boot, REST APIs, JWT Authentication
Databases	MySQL, MongoDB, Oracle SQL
Core Computer Science	Data Structures and Algorithms, Object-Oriented Programming, DBMS, Operating Systems
Tools & Platforms	Git, GitHub, VS Code, Vercel, Render
Concepts	Full-Stack Development, API Integration, Responsive UI/UX Design

ACHIEVEMENTS & CERTIFICATIONS

- Solved 100+ Data Structures and Algorithms problems on LeetCode
- Completed 3 NPTEL courses in core computer science domains
- Active GitHub contributor with project-based learning experience
- Certifications: [GitHub Portfolio](#)
